ABSTRACT

COVER FOR THE REAR BAG COMPARTMENT OF A GOLF CART

The invention is an apparatus and methods for covering the rear bag compartment of a golf cart. The invention is configured for attachment to a support frame of a golf cart, wherein the support frame supports a hard roof top for the golf cart. The invention includes a stationary frame member, a movable frame member, and a cover. The stationary frame member is configured for mounting to the support frame of the golf cart. The movable frame member is configured for mounting to the stationary frame member, and further configured to pivotably rotate over a portion of the rear compartment of the golf cart. The cover is configured for mounting to the movable frame member so that when the movable frame member rotates over a portion of the rear compartment of the golf cart, the cover covers a portion of the rear compartment of the golf cart.
